- (c) To promote the retention of distinctive detailing on commercial properties.
- (d) To retain original parapet continuity and detailing.
- (e) To retain architectural features and detailing that characterise the period of development.

Controls

8.19.1 All Development

- (a) Generally, the facade at street alignment shall comprise a canopied shop front at ground level, and first floor facade above the awning.
- (b) The height of the building at the facade shall take into consideration existing parapets and other facade details of established surrounding development.
- (c) Additional floors should be setback from the street alignment to ensure a two storey elevation to the facade is maintained where appropriate (refer to Figure 21).
- (d) Consideration will be given to a variation of the established alignment in the case of a comprehensive development incorporating a pedestrian open space function.
- (e) Developments on corner sites should be designed to accentuate the corner, and provide the transition between one streetscape and the next. Existing corner splays shall be retained.
- (f) Signage shall be restricted to under awning shop fronts, awning fascias and as suspended under awning signs.
- (g) Signage above the awnings shall be limited to appropriate areas allocated for such a purpose in the original facade design (parapets for example).
- (h) Flush mounted, or projecting wall signs shall not be permitted above the awning. Council will give consideration to the architectural qualities of the building when addressing the suitability of the proposed sign.
- (i) Pitched or domed awnings of glass or canvas construction shall not be permitted where they interrupt a run of traditional awnings.
