

- (k) Fencing which is used to delineate private space is to be used in a way which enhances safety by maximising opportunities for casual surveillance between the dwellings and the street frontage.
- (l) Materials should minimise opportunities for vandalism.
- (m) Flat or porous finishes should be avoided in areas where graffiti is likely to be a problem. Use non-porous material such as glazed ceramics or treated masonry products.
- (n) Where large blank walls are unavoidable, consider the use of a “green screen” i.e. planting vegetation in front of the wall or using vegetation to cover the wall itself. Alternatively use vandal resistant paint or artwork to reduce opportunities for graffiti or articulate or modulate the wall.
- (o) Ensure individual dwellings are equipped with security devices.
- (p) Where public spaces of larger developments could result in the gathering of groups of people, the development may be required to provide CCTV facilities to monitor those areas.
