

15.2 ACTIVE STREET FRONTAGES

This Part applies to commercial and mixed use development that is subject to *Part E Site Specific Development* and/or that is marked on the WLEP Active Street Frontages Map

Active frontages include internal building spaces that have direct pedestrian access or visibility to the street and provide important centre activities such as commercial, civic and entertainment uses. These frontages contribute to the liveliness of a street, and are a key component of a people focused place.

Uses that can facilitate active frontages are any of the following:

- Entrance to retail;
- Shop front;
- Glazed entries to commercial and residential lobbies occupying less than 50% of the street frontage, to a maximum of 12m frontage;
- Café or restaurant if accompanied by an entry from the street;
- Active office uses, such as reception, if visible from the street; or
- Public building if accompanied by an entry.

Objectives

- (a) To promote pedestrian activity and safety in the public domain
- (b) To provide a high degree of surveillance over the street.
- (c) To provide transparency and visual connection between the street and the building's interior.
- (d) To facilitate future adaptability and flexibility of uses.
- (e) To provide high standards of accessibility.
- (f) To supplement the WLEP controls for active street frontage.
- (g) To maximise the amount of active frontages throughout centres.
- (h) To ensure development encourages appropriate streetscape activation and active participation by the public.
- (i) To ensure that development provides a well-connected, weather protected public domain to reduce the impact of wind and rain and provide adequate shade for pedestrians.
- (j) To create a 'public face' for buildings to enhance the character of streets.
- (k) To promote a high level of visual connectivity and physical accessibility between the street and the active frontage premises.

Controls

15.2.1 General Controls

- (a) Development is to be constructed to the front property boundary.
- (b) Active ground floor uses are to be at the same general level as the footpath and be accessible directly from the street.
- (c) Sites identified as Active Street Frontage in this DCP must not provide vehicle access across the Active Street Frontage.
- (d) At ground level provide large, clear glazed windows with the sill at a minimum of 500mm above finished floor level.
