

1.3 STREETScape AND VISUAL IMPACT

Objectives

- (a) To enhance the built form by encouraging quality design that corresponds harmoniously with the surroundings.
- (b) To encourage and facilitate lower density residential accommodation of a high architectural and aesthetic standard, that acknowledges and responds to the architectural style, scale, materials and character of the existing built environment.
- (c) To ensure development provides a clear distinction between private and public space and encourages casual surveillance of the street.
- (d) To ensure views to and from a public place including parks, reserves, beach or the ocean are preserved.

Controls

- (a) New development should be visually compatible with its streetscape context. It should contain or at least respond to essential elements that make up the character of the surrounding area.
- (b) When replacing existing windows, the style is to complement the style and proportions of the existing dwelling when viewed from the street.
- (c) Contemporary alterations and additions should include windows characteristic of the style of the addition.
- (d) Development must not dominate or erode the character of the streetscape, particularly when viewed from a public place such as parks, reserves, beach or the ocean.
- (e) New development as well as alterations and additions to existing dwellings are to maintain the established character of the building in terms of significant landscaping. Existing ground levels and significant landscaping is to be maintained.
- (f) Existing verandahs and balconies fronting the street are not to be enclosed.
- (g) Porticos above a fence or entrance way are to minimise bulk and are only appropriate where it can be demonstrated that they are consistent with the existing street character.
