

**1.11 DORMER WINDOWS****Objectives**

- (a) To ensure additions to roofs for the purposes of accommodation, are proportionate and complementary with the character of the dwelling and streetscape.
- (b) To ensure where part of a semi-detached dwelling pair, row or group, the character of dormer and roof windows is consistent in all respects, to conserve the unity of the group.

**Controls**

- (a) Where the height of the roof as measured from the gutter to the ridge is less than 2.5m, windows must be flush to the roof and limited to one per single fronted dwelling, or a pair on a double fronted dwelling.
- (b) Each dormer window is to be contained within one dormer roof structure.
- (c) The ridge of any dormer roof structure shall generally be a minimum of 300mm below the main ridge of the roof of the dwelling.
- (d) Where the dwelling is part of a semi-detached pair, row or group of like dwellings, any dormer or roof window must match the unity of the group and the total width of dormers should be no greater than 25% of the width of the roof.
- (e) In terrace style dwellings, a skillion dormer may be permitted at the rear of the roof, provided the existing ridge line is maintained, the addition is set below the ridge and a side setback of minimum 900mm is maintained. In addition, the rear skillion dormer is not to extend beyond the rear gutter line.
