

### 1.12 BATTLE AXE BLOCKS

A battle axe block is an allotment that has access to a road by an access laneway or 'handle'. Battle axe subdivision is not a preferred subdivision pattern in Waverley Council, however may be considered when it can be demonstrated that the subdivision will not negatively impact upon the streetscape character, or the amenity of surrounding developments.

#### Objectives

- (a) To ensure battle axe block development achieves acceptable levels of quality building design, amenity, landscaping and access.
- (b) To ensure development is of a size and scale that minimises adverse impacts on the amenity of adjoining residential properties.
- (c) To minimise subdivision that results in battle axe blocks.

#### Controls

- (a) Dwellings on battle axe blocks are restricted to single storey in height. Exceptions may be considered where the lot (excluding the access handle) has a minimum area of 450m<sup>2</sup>, a minimum width of 12m and a minimum depth of 12m, and the building is able to achieve large setbacks to boundaries on all sides. In such circumstances it must be demonstrated that the proposed dwelling will have minimal detrimental impacts upon adjacent residential development and the proposal shall accord with other controls in *Part C1 Low Density Residential Development* of this DCP.
- (b) The alignment of dwellings on battle axe blocks should take reference from the alignment of dwellings on adjacent sites. Where a dwelling cannot align with the predominant front and rear alignments of adjacent dwellings, it should be sited and orientated in a manner that will minimise amenity impacts on adjacent dwellings, while maximising the residential amenity to the proposed dwelling in terms of solar access and private open space.
