

- (a) Additions are to be cohesively integrated with the finishes and detail of the existing building.
- (b) The style, pitch, profile and colour of roofs to proposed additions are to match and complement the existing roof form of the dwelling.
- (c) Historic features of the existing roofscape are to be identified and where appropriate be incorporated into the proposed addition.
- (d) Dormer roof forms are to be used in a manner characteristic of the original style of the subject dwelling.
- (e) New roofing is to match the original roofing in material colour and profile. Where roofs of adjoining semi-detached dwellings are currently different to each other, new additions are to match the roofing of the adjacent semi-detached dwelling.
- (f) Windows to first and ground floor additions are to be in scale and proportionate to the original windows in the semi-detached dwelling.
- (g) Upper wall finishes are to reflect the style and character of the original building finishes.

1.13.4 Side setback and courtyard design controls for terraces

- (a) The common (or party) wall between a pair of terraces can be built with no side setback along the common boundary where it abuts an existing wall to the neighbouring property or where it can be reasonably expected that a wall to the neighbouring property would be constructed in the future.
- (b) The outer side wall of the building (i.e. the wall that is not a shared wall or party wall), should be set back a minimum of 900mm from the outer side boundary (refer to Figure 12).
- (c) Part of the outer side wall may be built to the outer side boundary to create an internal courtyard. The wall on this boundary should generally be a maximum of 2.1m in height. Refer to Figure 12.
- (d) Internal courtyards must have a minimum 1.5m dimension depth and should be the same width as the outrigger projection (Figure 12)
- (e) No openings are permitted for walls built to the side boundary.
- (f) The extension should not encroach beyond the predominant rear building line (refer to Figure 12).
