

2.1 SITE, SCALE AND FRONTAGE

Objectives

- (a) To ensure lot size and dimension are able to accommodate the appropriate building envelope, landscaping and service requirements.
- (b) To ensure development sites have adequate street frontage to meet side setback and building requirements.
- (c) To ensure lot sizes and building forms are appropriate to the streetscape.
- (d) To provide guidance on the appropriate scale of development to complement the FSR controls within the WLEP.
- (e) To encourage amalgamation of allotments to provide for improved design outcomes.
- (f) To prevent the isolation of sites.

Controls

- (a) New residential flat buildings must be located on sites which feature a minimum frontage width (measured at the boundary) of 15 metres for R3 zones and 20 metres for R4 zones.
- (b) Variations to control (a) may be accepted if Council can be satisfied that the development:
 - (i) Complies with the site and building design controls outlined in this Part between sections 2.2 to 2.21.
 - (ii) Provides safe and efficient access and servicing facilities - particularly in relation to parking, pedestrian and vehicle access, collection and storage of waste.
 - (iii) Provides a high standard of resident amenity - particularly in relation to privacy, solar access, ventilation, and the provision of outlooks to landscaped setbacks.
 - (iv) Responds to the local context, including providing adequate separation from existing and future adjoining development.
- (c) Lot sizes and dimensions must enable development to be sited to protect the natural or cultural features of the site and avoid significant changes to the natural topography.
- (d) Applications for new residential flat building development must not result in the isolation of neighbouring lots by reducing the development potential of adjoining land. Applicants may be required to submit plans that clearly identify the future development potential of adjoining land to ensure its development potential will not be adversely impacted. Considerations should include the ability for neighbouring sites to comply with the requirements of this DCP and the ADG.
Note: Assessment of applications will need to refer to the Planning Principles established by the Land and Environment Court *Karavellas v Sutherland Shire Council [2004] NSWLEC 251*.
