

2.8 PEDESTRIAN ACCESS AND ENTRY

Objectives

- (a) To ensure developments provide high quality, accessible and safe pedestrian access to all people who live in and visit the development.
- (b) To create entrances which provide a desirable residential identity for the development to orientate visitor(s).
- (c) To contribute positively to the streetscape and building façade design.
- (d) To promote development that has a strong connection to the street and contributes to the accessibility of the public domain.

Controls

- (a) Provide main building entries at street level which respond to patterns in the streetscape. Refer to Figure 22.
- (b) Provide an accessible path of travel from the street to and through the front door of all dwellings on the ground floor.
- (c) To increase accessibility, applicants should consider providing lifts in buildings of more than two habitable levels.
- (d) Separate and clearly distinguish between pedestrian access ways and vehicle access ways/building service areas (e.g. garbage rooms).
- (e) Locate entries so that they relate to the existing street and subdivision pattern, street tree planting and pedestrian footpath.
- (f) Provide main building entries that are legible, safe and well lit.
- (g) Provide as direct a physical connection as possible between the street and the building entry.
- (h) Where appropriate, provide individual ground floor dwelling entries that address the street.
