

B2 ECOLOGICALLY SUSTAINABLE DEVELOPMENT

This Part applies to all development in the Waverley LGA.

Waverley Council is committed to the highest standards of environmental performance and stewardship of our local area. Council has established long-term environmental targets for Council and Community, covering greenhouse emissions, transport, climate resilience, urban ecology, water management and the sustainable management of waste and materials. Our targets are informed by the best available science and support Ecologically Sustainable Development (ESD) through the following objectives:

- Reducing greenhouse gas emissions to net zero;
- Increasing the use of renewable energy sources;
- Conserving water resources;
- Reducing reliance on mains water supply through the collection and treatment of rainwater and greywater;
- Adapting and responding to climate change to reduce community vulnerability to local climate change impacts and managing climate risks;
- Reducing waste during construction and the ongoing use of the building;
- Increasing recycling of waste and use of recycled products;
- Reducing the environmental impact from building materials through the reduction, re-use and recycling of materials, resources and building components;
- Protecting and improving local biodiversity of sites and surrounding areas.

Residential Development and BASIX

State Environmental Planning Policy (Sustainable Buildings) 2022 applies to residential developments only and aims to ensure homes or apartments are designed to minimise potable water usage and energy usage.

An applicant is required to lodge a BASIX certificate with their development application with Council for:

- New residential buildings;
- Alterations and additions to existing residential buildings where the estimated construction cost of the work is more than \$50,000 and where development approval is required; and
- New swimming pool (or pool and spa) with a capacity of 40,000 litres or more.

More information is available at the following link:

Mandatory Commercial Building Disclosure

In 2010 the Australian Government implemented a Mandatory Commercial Building Disclosure program under the [Building Energy Efficiency Disclosure Act \(2010\)](#). This program applies to commercial buildings with a net lettable floor area of 1,000sqm or more, and requires owners to disclose energy efficiency information to purchasers and lessees when the space is to be sold, leased or subleased. More information is available from the Australian Government's Department of Industry, Science, Energy and Resources (or equivalent).
