

Objectives

- (a) To encourage applicants to apply principles and processes that contribute to ecologically sustainable development (ESD) in Waverley.
- (b) To ensure that the design, construction and operation of development minimises adverse impacts on the natural and built environment.
- (c) To improve the quality of life, health and wellbeing of residents and workers.
- (d) To ensure that all development will reduce water consumption and can reduce greenhouse gas emissions to net zero.
- (e) To encourage the replacement of intensive carbon power sources with low carbon and renewable energy.
- (f) To improve indoor air quality.
- (g) To ensure that waste will be reduced and to increase the use of products from recycled sources
- (h) To reduce the environmental impact from building materials through reduction, re-use and recycling of materials, resources and building components
- (i) To reduce urban heat island effect by maintaining and increasing tree canopy, permeable surfaces and deep soil.
- (j) To reduce greenhouse gas emissions from the construction of developments.
- (k) To respond to and prepare for changes in the climate and resource consumption.
- (l) To ensure that development can adapt to climate change.
- (m) To improve local biodiversity.
- (n) To accommodate changing technologies in the design of developments that will provide sustainability outcomes in the built environment for future users.

Controls

- 1) A Statement of Environmental Effects is required to outline how the objectives of ecologically sustainable development will be achieved
