

1.2 URBAN FORM CONTROLS

Objectives

- (a) To ensure that Bondi Junction Centre is a vibrant and attractive commercial area.
- (b) To define the desired future character and urban form for Bondi Junction Centre.
- (c) To reinforce the role of Bondi Junction as a Strategic Centre as identified by the NSW Government.
- (d) To promote built form that increases access to natural ventilation and lighting.
- (e) To coordinate building massing along streets and across blocks.
- (f) To ameliorate the effects of existing unevenly scaled and massed buildings.
- (g) To mitigate the visual effect of tall buildings on the street.
- (h) To mitigate environmental effects of tall buildings on existing surrounding low scale residential development.
- (i) To ensure the streetscape setting for heritage buildings and other noteworthy buildings is retained and enhanced.
- (j) To create diversity within the Bondi Junction Skyline.

Controls

- (a) Development must be sensitive to the streetscape character and views. A streetscape and context analysis is to be provided in accordance with Part B11 Design Excellence.
- (b) A lower 2/3 storey shop front façade is required along Oxford Street and Bronte Road, as identified in Figure 12, and a 6 storey street wall is required on all other streets.
- (c) Above the block edge form a tower building form is required. This form is to be set back from the street edge and from the front, side and rear boundaries (refer to Figures 13 and 14).
- (d) Towers must be slender so as to:
 - (i) Facilitate cross ventilation;
 - (ii) Provide high quality amenity to occupants of the building;
 - (iii) Encourage view corridors;
 - (iv) Provide greater solar access to public spaces and other buildings; and
 - (v) Clearly differentiate between the podium and tower elements.
