

1.6 HERITAGE AND BUILDINGS OF HISTORIC CHARACTER

Objectives

- (a) To ensure buildings of historic character, and original shop fronts, are retained or reinterpreted.
- (b) To retain the streetscape setting of sites and buildings of historic, architectural and aesthetic significance.
- (c) To recognise the opportunities for heritage sites and contributory buildings to inform streetscape character.
- (d) To ensure developments in or adjacent to conservation areas retain and enhance the conservation values of that area.

1.6.1 Buildings of historic character

Controls

- (a) Lots identified with buildings of historic character are to retain as a minimum the facade (for a depth of 2m) of the building or preferably the whole building (refer to Figure 7).
- (b) Where a facade cannot be retained the new buildings are to interpret the scale, facade modelling including the location and percentage of glass to solid wall and the vertical and horizontal proportions of the existing building.
- (c) Where the building form, detailing or use of individual buildings of historic character have been inappropriately altered and changed, any application to upgrade or re-use the buildings must clearly demonstrate that the architectural and streetscape value of the building will be enhanced by the proposal.
- (d) Any application to demolish an identified building of historic character must clearly demonstrate that a replacement building will possess equal or higher quality contributory value regarding streetscape, character, architectural design and material quality.
- (e) New development adjacent to buildings of historic character must have facades sympathetic in vertical and horizontal proportions and alignments.
- (f) New buildings adjacent to buildings of historic character or heritage items should display proportions respectful of and build upon proportions similar to adjoining streetscape and forms.
- (g) New buildings adjacent to buildings of historic character or heritage items should draw on the predominant pattern of the streetscape. They are to be open & glazed at street level, have emphasis toward a singular enclosed building form at upper levels and be capped by a lighter more articulated element.
