

1.17 DESIGNING BUILDINGS FOR FLEXIBILITY**Objectives**

- (a) To improve the quality of the built environment and apply sustainable practices.
- (b) To encourage the design of low energy consumption, durable, flexible, adaptable buildings.
- (c) To promote the design of robust buildings to allow flexibility over time, for conversion between residential and commercial uses.

Controls

- (a) Design the podium component of buildings (Level 2 – Level 5) to permit adaptation for other future uses, with minimal structural and service alteration by:
 - (i) Concentrating the location of service elements such as fire stairs, air conditioning units, service risers, toilets, kitchens and the like together to allow larger free floor plate areas; and
 - (ii) Designing service areas and risers generously to make them readily accessible and capable of additional capacity.
