

1.18 CEILING HEIGHTS**Objectives**

- (a) To ensure internal amenity is maximized.
- (b) To promote solar access into all buildings.
- (c) To ensure adequate spatial provision for services.

Controls

- (a) Coordinate internal ceiling heights and slab levels with external height datum lines such as datum and parapet lines set by surrounding existing buildings.
- (b) Increase the sense of space in rooms through provision of well-proportioned rooms.
- (c) Use tall windows or highlight windows, as well as light shelves and fan lights to reflect natural light deeper into a floorplate.
- (d) Stack wet areas from floor to floor to allow taller floor to ceiling heights in habitable areas.
- (e) Commercial and retail buildings must provide the following ceiling heights:
 - (i) Minimum 4m floor to ceiling heights at Ground Floor
 - (ii) Minimum 3.3m floor to ceiling heights at First Floor and above.
