

- (f) The design and finish of new through site links need to be provided in accordance with Council's *Public Domain Technical Manual for Bondi Junction Centre*.

Pedestrian links

- (g) Through site links for pedestrians are to be provided as shown in Figure 38 and have active ground floor frontages; be legible and direct throughways for pedestrians; provide public access at all business trading times or as otherwise stipulated by Council's conditions of approval; have a minimum width of 3m non-leasable space clear of all obstructions (including columns, stairs and escalators); where practicable, have access to natural light for at least 30% of their length; where air conditioned, have clear glazed entry doors comprising at least 50% of the entrance; have signage at street entries indicating public accessibility and the street to which the through site link connects; and maximise opportunities for integration of public art installations.
- (h) Internal arcades will not be approved in preference to activation of an existing or required lane. Where developments front a lane that is also a pedestrian route, provide an active frontage and design details that create visual interest such as landscaping, awnings, paved finishes and good lighting.
- (i) When a publicly accessible pedestrian connection is proposed to link directly to the railway line, Transport for NSW must approve connections to railway stations and approve designs. In addition, the developer will be required to enter into an agreement with Transport for NSW defining the controls to be implemented in managing access.
- (j) Due to its proximity to Bondi Junction Station and substantial foot traffic, Bronka Arcade is to have a minimum width of 6m, a minimum height of two storeys and have active frontages on both sides. (Note: A greater Floor Space Ratio and maximum building height is available for 153-165 Oxford Street in order to provide this through site link.)
