

**Controls**

- (a) All site facilities are to be integrated into the design of the building.
- (b) For developments where a fire brigade vehicle is required to enter the site, vehicular access, egress and maneuvering must be provided to, from and on the site in accordance with the NSW Fire Brigades Code of Practice – Building Construction – NSWFB Vehicle Requirements. Generally, provision must be made for NSW Fire Brigade vehicles to enter and leave the site in a forward direction where: NSW Fire Brigade cannot park their vehicles within the road reserve due to the distance of hydrants from the building or restricted vehicular access to hydrants; or the site has an access driveway longer than 15m.

**1.22.10 Special Areas****Objectives**

- (a) The Rowe Street and Bronka Arcade sites, on the north and south sides of Oxford Street Mall, lie at the crossing of important pedestrian routes through Bondi Junction. These sites offer an opportunity to enliven Oxford Street Mall and the centre of the Bondi Junction Centre area more broadly, by activating the area through increased pedestrian traffic and enhanced permeability of the area.
- (b) On the Rowe Street site, a major new link is to be created between Oxford Street Mall and the railway interchange. This link will encourage greater pedestrian traffic on the Mall, improving the desirability of retail floor space in the Bondi Junction Centre.
- (c) On the Bronka Arcade site, existing connections are to be maintained and enhanced by a more generous, double height arcade connection to Spring Street.

**Controls***Built form*

- (a) On the Rowe Street site, new development must comply with the solar access plane illustrated in Figure 41, which ensures that new development on this site does not overshadow the Oxford Street Mall in winter. On the Bronka Arcade site, new development is permitted to rise to 40m from the 9m setback to Oxford Street Mall.

*Public Domain Interface*

- (b) In order to ensure a high quality interface with the retail frontage along its length, the covered arcade connecting Oxford Street Mall and the railway concourse/Tiffany Plaza development should have the same finished floor level as the mall, and should be level along its entire length. The connection down to the railway station and up to the Tiffany Plaza development should consist of escalators, stairs and a lift, contained within an arcade-style development with active frontages. Development on the Rowe Street site is to be serviced from Grosvenor Lane.
- (c) In order to encourage the activation of Spring Street, development on the Bronka Arcade site is to be serviced below ground, or on a limited hours basis from Spring Street.
