

2.2.4 Campbell Parade North

Existing Character and Built Form

Campbell Parade is the principal street that follows the gentle curve of Bondi Beach. A regular pattern of secondary streets runs perpendicular with the Campbell Parade retail strip. The land is steeply sloping towards Dover Heights and the secondary streets generally run along the contours (refer to Figure 47).

This area has a variety of building types including dwelling-houses, townhouses and residential flat buildings. Shop-top housing is generally located towards the corners.

Existing buildings along Campbell Parade have narrow frontages and are built to the street alignment, with notable facades that contribute to its Interwar heritage. Many sites contain contributory buildings which contribute to the overall character of the Area. These buildings are generally intact and consistent with other 1920s/30s precincts in Sydney.

Existing buildings are predominantly rendered masonry with parapets with a vertical expression through the use of bay or vertically proportioned windows, pilasters and few balconies, typically enclosed.

Buildings are generally oriented to the south to take advantage of the view over Bondi Beach, with some balconies. The orientation and narrow frontages limit solar access and cross ventilation.
