

3.1.3 Macpherson Street**Figure 52** Macpherson Street Centre**Existing Character and Built Form**

The Macpherson Street local village centre provides approximately 60 small commercial premises spread out along the length of the street, stretching from Leichardt Street in the West to St Thomas Street in the East. The range of shops provide for the daily needs of the local community. To the East, near St Thomas Street, the building stock along the ridge-top road is characterised by three (3) storey, mixed-use masonry buildings of diverse styles, both pre-War (c1900) and Interwar. Characteristic buildings have ground floor shops under continuous awnings, residential upper storeys, and some possess intact shop-fronts, or some original elements.

A number of buildings at the west end are higher density residential buildings, while other buildings retain original shop-fronts. Intrusive buildings along Macpherson Street include multi-storey residential and large non-residential buildings. To the West, near Lugar Street, the area is characterised by two (2) storey Interwar commercial buildings of masonry construction, with both decorative face brick and rendered and painted finishes.

Significant views of the ocean exist east along Macpherson Street and to Clovelly looking south from the junction of Macpherson and St Thomas Streets.

Simpson and Macpherson parks are located at the junctions of Macpherson Street with Firth and Carlton streets. These contribute significantly to the character of the centre, allowing clear southern vistas and valued open space. The existing buildings are of two (2) to three (3) storeys in height.

Desired Future Character Objectives

- (a) To maintain the built form arising from the historical subdivision pattern and the small shop character at street level.
- (b) Maintain the public views and outlook at the eastern end of the centre, as well as outlook over open space at the western end of the centre.
