

3.2 GENERIC CONTROLS

This section outlines the general planning controls that apply to all centres.

Note: Compliance with a control does not guarantee that the objectives are satisfied.

In some instances the design solutions may not be appropriate for the particular site or situation and Council may require an alternative design solution.

In order to ensure the physical characteristics of the site and the nature and proximity of adjoining and nearby development has been considered, a centre analysis is required to be submitted with all development applications which includes the existing built form within the surrounding local village area. Refer to the *Waverley Development Application Guide* for further details.

Annexures are provided to illustrate examples of typical built form envelopes for 2, 3 and 4 storey local village centres as follows:

- *Annexure E3-1* – 2 storeys
- *Annexure E3-2* – 3 storeys
- *Annexure E3-3* – 4 storeys

3.2.1 Land Uses

Objectives

- (a) To provide for a range of predominately small shops and services to meet the daily needs of the local resident community.
- (b) To ensure the ground floor small shop character of each centre prevails and is protected.
- (c) To limit and manage potentially disruptive uses, such as cafes and restaurants in order that they do not dominate a centre or limit the provision of a broad range of local shops that are needed to meet the needs of the local resident community.
- (d) To promote mixed-use development incorporating high quality residential use above ground level.
- (e) To improve the quality of the built and pedestrian environment, particularly the interface between properties and land uses.

Controls

- (a) The ground floor component of a mixed use building is to be used for a permitted non-residential use, with the exception of:
 - (i) Access areas for residential dwellings on upper levels.
 - (ii) Existing purpose built approved and occupied residential dwellings occupying the ground floor of a building.
 - (iii) Where a site addresses a rear lane, the residential dwellings may address the rear lane at ground level but only where all other Local Village Centre planning controls have been satisfied.
