

Controls

- (a) Garbage and recycling storage and collection areas, and the structures in which they are contained, are not to be visible from the public domain.
- (b) Setbacks on ground level at the rear are not to be used at all for any purposes associated with storage of waste or recycling material, such as garbage rooms or bottle storage. Buildings are to be designed and used in a manner that ensures that these activities are wholly contained within the building proper. The only exception is for the regular collection of waste and recycling from the rear, in the event of rear lane access. Where a setback at the rear at ground level is provided, it is to be designed and maintained as a landscaped buffer between the subject site and the adjoining properties to the rear.
- (c) The rear of buildings, at ground level, where they back directly on to residential properties or uses, are to be designed to be effectively 'sealed' at the rear, in order that noise and odour transmission from the rear of these premises does not occur in any form that detracts from the amenity of the adjoining residential properties.
- (d) New and refurbished buildings must incorporate venting from ground floor premises in a way that does not result in the transfer of cooking odours impacting on residential properties within the same site/building or neighbouring and adjacent residential properties.
- (e) Air-conditioning units, exhaust fluing, mechanical ventilation ducting, including venting and exhaust structures and equipment associated with ground floor food premises such as cafes and restaurants and the like, are not to be located in front of the front building line or in places clearly visible to the main street frontage or any adjoining or nearby residential properties should be integrated into the building.
- (f) Mixed use buildings are to be provided with sound proof materials between the commercial and residential level.
- (g) Mixed use buildings are to be provided with one only common television antenna and/ or satellite dish, which is to be unobtrusive in appearance when viewed from the public domain.
- (h) Residential units within mixed use developments are to be provided with laundry facilities and at least one external clothes drying area, not visible from the public domain.
