

7.3 BUILT FORM

Objectives

- (a) To ensure an appropriate scale of new development on the site.
- (b) To provide guidance for the location of buildings.
- (c) To ensure new development responds to the heritage characteristics of the site.
- (d) To generate a campus-style arrangement of development.
- (e) To support sufficient landscaping to enhance visual quality, streetscape character and provide privacy.
- (f) To integrate building form with the sloping topography of site.

Controls

- (a) The location of buildings is to comply with the Principles in 7.1 General and the layout shown in Figure 3.
- (b) The number of storeys is to comply with Figure 3. However, due to the sloping nature of the site, it may be possible to achieve a greater number of storeys than the maximum number of storeys specified in Figure 3 to enable optimised building layout, so long as the built form does not exceed the alternative height of buildings of 15m and 21m specified in the WLEP unless in line with control (k) and not in contradiction with (e).
- (c) The redevelopment of the site is to read as a campus-style development, having consistent style and architectural qualities across the site.
- (d) Despite the alternative building height of 15m and 21m permitted in the WLEP, the following controls apply to any building located adjacent to the Ellerslie building:
 - i. Any storey above the upper gutter line of the principal-built form of the Ellerslie building is to provide a contemporary and complementary design response so as to avoid any adjacent building overbearing its heritage setting.
 - ii. Is not to overwhelm the Ellerslie building, and is to provide sufficient distance between the buildings to maintain the curtilage of the Ellerslie building.
- (e) Despite the alternative building height permitted in the WLEP, any new built form extension to the cottages on the corner of Bronte Road and Church Street:
 - i. is not to overwhelm the cottages, and
 - ii. if connected to any new building fronting Bronte Road is to have a maximum of one storey, with a maximum height that is beneath the underside of the gutter line of the cottages or;
 - iii. if not connected to any new building fronting Bronte Road, a maximum of two storeys.
- (f) New buildings fronting Bronte Road and Birrell Street are to be modulated and articulated to break up long facades to the streetscape.
- (g) Buildings are to be setback from the street frontage to provide privacy and opportunities for landscaping, including where appropriate, mature tree planting.
- (h) New buildings are to provide appropriate architectural modulation and
