3.2.2 Landscape on Structures

Objectives

- (a) To encourage engaging communal open spaces to be created above basement or podiums, or on roof tops.
- (b) To ensure that adequate provision is made for soil depths, structural provisions to support planting, and drainage and waterproofing requirements.

Controls

- (i) Where set downs are provided, ensure the depth is suitable for paving thickness or the required soil depth for the proposed plants.
- (ii) Minimise visual and physical clutter through the careful design of planter beds and mounds.
- (iii) Innovative design strategies that allow integrated seating to be provided through planter beds at 450mm high are encouraged.
- (iv) Provide raised platforms or mounding to achieve greater soil depth to support planting of larger trees in appropriate areas.
- (v) Demonstrate that adequate drainage and waterproofing is provided for the species and volumes of plants and soil.
- (vi) Provide appropriate methods for capturing, storing and treating run off from landscapes on structures for reuse on the site.
- (vii) Utilise lightweight soil mixes that are porous, able to drain freely, and suitable for the selected plant species.
