

ANNEXURE E2-1 DESIGN GUIDELINES

The elements shown in each group are drawn from buildings in the Bondi Beachfront Area and represent a selection of representative types and building scale for reference purposes. In all cases, site specific requirements and physical parameters will affect the design solution. As well, the vitality of individual choice extends and enriches the design process.

The guidelines are provided as diagrams rather than being prescriptive. This allows interpretation with the wide range of materials and styles while at the same time, providing variety and flexibility, thereby uniting the street in urban design terms and providing a high degree of continuity.

WALLS

The Bondi Beachfront Area includes buildings with almost every type of masonry wall finish, with timber used as panelling in gables, balconies, bay windows and other secondary uses.

The embellishment of walls, roofs and parapets exemplifies the stylistic differences of each succeeding period. Walls and their concluding parapets are visually important and the development of wall surfaces with a multiplicity of textures and patterns also provides interest and character to otherwise bleak buildings. New buildings should continue this tradition and avoid the bland unornamented brick surfaces of recent unit development.

Materials include:

- Brick
- Render
- Stone
- Roughcast
- Fibre Cement Sheet
- Shingles
- Timber
