

The obligatory requirements for upgrading to these standards generally apply to fire safety, essential services, equitable access and work safety and occupational health standards.

For new work and obligatory upgrade works, the compliance with the NCC is framed in terms of performance standards, in compliance of which 'deemed to satisfy' requirements are defined. It is common practice in buildings of complexity such as St John's, for specific solutions to be engineered to meet fire egress requirements.

Compliance with the BCA does not signify compliance with the DDA. The provisions of the DDA are entirely qualitative. In 2010 the Commonwealth published the Disability (Access to Premises – Buildings) Standards. These are intended to ensure that the requirements of the Act are met.
