

Policy 6: The following historic spatial uses relating to the Victorian period should continue or be re-instated:

- early entrances and driveway;
- upper garden areas as garden / passive recreation.

7.2.4. Interpretation and Reconstruction

The Burra Charter defines interpretation as “*all the ways of presenting the cultural significance of a place.*” (Article 1.17) Interpretation can include restoration and reconstruction (ways of returning a place to a known earlier configuration), signs, publications, artworks, lighting and access.

Policy 7: The place should be interpreted as the whole estate developed by the Vickery Family as a residence, and then as a result of a major gift, developed as a War Memorial Hospital.

Policy 8: Creatively interpreting aspects of the history of the place should be considered as opportunities arise, including

- Develop the site with an appreciation of its identity as a single planned estate;
- Develop the site with an appreciation of the spatial order of the estate, which is contiguous over all of its history to date.

Policy 9: The following reconstructions, removals and plantings should be considered:

- Removal of glass portico to reveal front entrance of 1935 Hospital;
- Replacement of concrete driveways with more sympathetic material;
- Reconstruction of grass bank to western side of Edina;
- Recreation of the original driveway path, in a manner similar to the original path (this would require the removal of buildings);
- Reconstruction of lower garden area (currently a carpark) to a garden area;
- Planting of trees which are missing from north west corner of the upper garden;
- Construction of a built form to close north end of service space behind Edina (where a Victorian outbuilding formerly stood);
- Construction of some built or garden form on site of original gatehouse (to mark entrance).

7.2.5. Alterations to the Site (new buildings and landscape)

In many instances, changes will need to be made to significant fabric for good reasons. For example, the removal of some fabric of lower significance may be necessary in order to maintain fabric of higher significance. Generally, fabric of higher significance should be treated more cautiously than fabric of lower significance.

In this case, the site has the potential to be developed further in order to accommodate the continuing historic health care use. However, it would be less preferable to develop the site for different new uses.

The estate design is fundamentally orthogonal, but the arrangement of the carriage drive and the 1920s drive were carried out in the picturesque mode.
