

Alterations to the site must be careful of the significant fabric of the place and its potential underground archaeological deposits, predominantly the site of the demolished wing to the east of Vickery and the central pond as shown in Figure 11.

**Policy 10:** The siting of new buildings must respect the integrity of estate, its orthogonal and picturesque layouts, and the historic sequence of spaces. New buildings may be placed in the historic lower garden and service court spaces provided those spaces remain discernible. They may replace buildings assessed as being of moderate or low significance. New buildings should not be placed in the upper garden space.

**Policy 11:** the scale of new buildings should be of a scale consistent with the estate. This allows for large buildings; however, new buildings should not challenge the landmark qualities of the Edina tower or the Norfolk Island pines.

**Policy 12:** the character of new buildings and new landscape features should appear to be a development of the estate as a whole, in a similar way that the 1935 War Memorial Hospital appears in relation to Edina.

**Policy 12:** Should works involve areas of potential archaeological deposits, plan for proper investigation and interpretation of those deposits.

#### 7.2.6. Technical Oversight and Review of plan

**Policy 13:** Involve the standard of professional and craft expertise appropriate to each grade of significance in each area of the site.

**Policy 14:** Review this plan in step with the timing of review of the strategic plan of the Hospital and its masterplan, or when works are proposed to fabric or spaces of Exceptional or High Significance.
