Map Configuration	Planning
Layer	Biodiversity Habitat Corridor

Definitions are included at the end of this DCP.

Objectives

- (a) To ensure development contributes to the landscape character of the area.
- (b) To enhance planted native vegetation and the ecological functions of habitat corridors.
- (c) To reconstruct habitat in non-vegetated areas of designated wildlife corridors that will as far as possible, represent the combination of plant species and vegetation structure of the original community.
- (d) To reduce the adverse impacts of light pollution on local fauna.

Controls

- (a) A minimum of 50% of the proposed trees, 50% of the proposed shrubs and 50% of the proposed grasses and groundcovers (not including turfed areas) are to be native plants that are listed in *Annexure B3-1*. Cultivars or hybrids of listed plant species are not to be counted towards this requirement. Landscape plans must include a planting schedule that lists all plant species proposed, the number of plants of each species proposed, and indicate whether each plant species proposed is listed in *Annexure B3-1*.
- (b) Three strata of vegetation are required to be included in landscape design (i) tree or tall shrub canopy, (ii) mid-storey and (ii) groundcover layer.
- (c) All plants identified as priority weeds under the *Biosecurity Act 2015*, and those plants identified by Council as local environmental weeds on the property at the time of development are to be removed by a suitably qualified person.
- (d) Trees with hollows will be retained for habitat wherever possible to provide habitat for arboreal fauna. Consideration must be given to the potential risk of damage to public or property as determined by a suitably qualified arborist.
- (e) Council may require additional supporting information for an application including the following:
 - (i) Vegetation management/protection plan; and/or
 - (ii) Flora or fauna impact assessment; and/or
 - (iii) An indication as to whether the proposed development is likely to significantly affect threatened species, populations, ecological communities or their habitat assessed in accordance with the *Biodiversity Conservation Act 2016*.
- (f) External illumination fixtures must be directed downwards and away from reflective surfaces, avoid spill into parks, reserves and bushland and avoid short wavelength (blue-violet) light.
