

4.2 BULK, SCALE AND DESIGN

Objectives

- (a) To maintain the residential character of established residential areas.
- (b) To ensure that the scale of places of public worship is consistent with the scale of existing or likely future development in the area.

Controls

- (a) Development must be sensitive to the streetscape character and views. A streetscape and context analysis is to be provided in accordance with *Part B12 Design Excellence*.
- (b) Places of public worship are to be designed and landscaped in a manner that enhances the quality and visual amenity of the streetscape.
- (c) New development for the purpose of a place of public worship within a residential zone is to have a maximum seating capacity of 200.
- (d) Entries to a place of worship must be in clear view of the street.
- (e) Where a place of public worship has a dual frontage, the development is to address both streets.
- (f) The location of windows, doors or balconies is to minimise overlooking or loss of privacy to adjacent residential properties.

Note: Consideration may be given to minor variation of the applicable WLEP height standard to accommodate the unique architectural requirements of places of public worship establishments, provided there is no resulting loss of amenity to surrounding properties.
