

4.3 ACOUSTIC PRIVACY

Objectives

- (a) To minimise noise levels from places of public worship that may impact upon neighbouring or nearby properties.
- (b) To ensure that places of worship are able to function within appropriate hours of operation and offer services appropriate to the function of the facility.

Controls

- (a) The design of the proposed place of public worship must minimise the projection of noise from any activities carried out within the site.
- (b) Adjoining and nearby residents should not be exposed to unreasonable levels of noise arising from the proposed use.
- (c) A noise impact assessment statement, prepared by a suitably qualified acoustic engineer, is to be submitted for development within residential zones or adjoining residential zones that proposes:
 - i. A new Place of Public Worship;
 - ii. New outdoor activities; or
 - iii. Intensification of existing activities.

The statement should describe hours of operation and predicted noise levels for regular outdoor activities and for special events such as festivals and religious celebrations.
- (d) Activities are to be carried out within the hours of operation outlined in the plan of management.
