

4.5 TRAFFIC, PARKING AND ACCESS

Objectives

- (a) To ensure that pedestrian safety is maintained and protected.
- (b) To ensure that the surrounding street network and intersections continue to operate effectively and within design parameters.
- (c) To minimise the impact of parking related to use of the place of public worship on the local streets.
- (d) To minimise adverse impacts upon the amenity of the neighbourhood.

Controls

- (a) A traffic impact statement is to be included with the development application. The statement shall:
 - (i) Assess the impact upon the surrounding streets and the measures proposed to mitigate such impacts.
 - (ii) Identify the number of parking spaces required on the basis of the general use of the site.
 - (iii) Identify the frequency of events (e.g. carnivals, celebrations, festivals, services), the attendance numbers associated with such events, and measures to mitigate and manage their impacts associated with traffic movements.
- (b) Clear distinctions should be made for vehicular traffic and pedestrian movements, both onsite and off-site. Measures should be taken to separate these and reduce potential conflict through design and management practices.
- (c) Off-street car parking must be integrated within the building envelope or within the footprint of the development.
- (d) Development is to comply with the provisions of *Part B8 Transport*.
- (e) The provision of parking is not to preclude the provision of landscaping.
- (f) New places of public worship, or places of public worship seeking to expand operations, are to provide a Green Travel Plan to demonstrate:
 - (i) The proximity of the facility to public transport;
 - (ii) How users of the facility will minimise the requirements for parking in the surrounding streets; and
 - (iii) How users of the facility will minimise the traffic generated by the facility.
