

Probable Maximum Flood (PMF) - The largest flood that could conceivably occur at a particular location, usually estimated from probable maximum precipitation.

Probable Maximum Precipitation (PMP) - The greatest depth of precipitation for a given duration meteorologically possible over a given size storm area at a particular location at a particular time of the year, with no allowance made for long-term climatic trends (World Meteorological Organisation, 1986). It is the primary input to the estimation of the probable maximum flood.

R

Recognised Habitat - means an area or areas occupied, or periodically or occasionally occupied, by a species, population or ecological community and includes any biotic or abiotic component.

Remnant tree - A native indigenous tree that remains in the landscape after removal of the majority or all of the native indigenous vegetation in the locality

Remnant vegetation - or bushland, is taken to be the original (pre 1788) native vegetation which has survived to this day. It includes both undisturbed and disturbed remnant vegetation. It also includes remnant vegetation which has colonised disturbed areas, where there was no vegetation for a period. The native plants species that grow within these remnants are referred to as indigenous. Remnant vegetation does not include native species that have been planted or introduced to the area.

Remove - To cut down, take away or transplant a tree from its place of origin

Resource Recovery - To re-use or recycle materials.

Restaurant - A building or place, the principal purpose of which is the provision of food or beverages to people for consumption on the premises, whether or not takeaway meals and beverages or entertainment are also provided.

Restricted Premises - means premises that, due to their nature, restrict access to patrons or customers over 18 years of age, and includes sex shops and similar premises, but does not include a pub, hotel or motel accommodation, home occupation (sex services) or sex services premises.

Retention - The storing of a form of water for beneficial use. Can apply to all forms of water including rainwater, stormwater and recycled water. May occur by storing water in a tank or by infiltration.

Re-use - Re-using a product for the same or different purposes without further manufacture, to prolong the original product lifetime.

Reliable Access - During a flood means the ability for people to safely evacuate an area subject to imminent flooding within effective warning time, having regard to the depth and velocity of flood waters, the suitability of the evacuation route, and without a need to travel through areas where water depths increase.

Risk - The chance of something happening that will have an impact. It is measured in terms of consequences and probability (likelihood).
