

4. **Fencing:** Refer to the relevant fencing section of the DCP for planning considerations involving only the erection of a fence for the type of development your application is considered. Any fencing that forms part of a proposed development is subject to the relevant flood effect and structural soundness considerations of the relevant category.
5. **Freeboard:** Where required the following freeboard heights apply:
 - a. Areas subject to oceanic flooding conditions: 500mm
 - b. Other areas: 300mm.
6. **Mixed Use Development:** For mixed-used developments, the planning controls apply to each use to the extent relevant. For example, Floor level and Building Component controls will typically apply to only the ground floor, while the balance of the controls could apply to the overall development.
7. **Subdivision:** When assessing subdivision the planning controls for the intended end use will be taken into consideration to ensure that any potential development on a new lot would be capable of meeting the controls.
