
6.2.1 Floor Level**Performance Criteria**

1. The cost of damages that may be incurred over the expected life of a development should be no greater than that which could be reasonably expected to be met by the occupants and/or the developer without Government assistance.
2. Despite the need to elevate floors, the development must remain acceptable with regard to its appearance and accessibility from the public domain and the amenity of the occupants.

Prescriptive Controls

1. All floor levels are to be equal to or greater than the 5% AEP flood level.
2. Habitable floor levels are to be equal to or greater than the 1% AEP flood level plus freeboard.
3. All floor levels are to be equal to or greater than the PMF level unless justified by a site-specific assessment.
4. All non-habitable floor levels shall be no lower than the 1% AEP flood level. Where this is impractical, non-habitable spaces should be flood-proofed to the 1% AEP level.
5. Floor levels shall be equal to or greater than the level of the 1% AEP flood level plus freeboard. Where this is not practical due to compatibility with the height of adjacent buildings, or compatibility with the floor level of existing buildings, or the need for access for persons with disabilities, a lower floor level may be considered. In these circumstances, the floor level shall be as high as practical and when undertaking alterations or additions no lower than the existing floor level.
