

B7 TRANSPORT

Car parking is one of the most critical planning and transport issues in Waverley. Wherever possible, Council strongly encourages the use of alternative modes of transport such as walking, cycling and public transport and continues to work towards providing better transport connections to the area.

The provision of private (on-site) and public (on-street) parking must be managed in an equitable and environmentally sensitive manner that benefits the community as well as the individual. Where objectives may conflict, Council has a duty to consider broader community benefits in the provision of parking.

Waverley's People, Movement and Places

This Part has been prepared in the context of the Waverley Transport Plan 2017 '*Waverley's People, Movement and Places*.' The aim of *Waverley's People, Movement and Places* is to:

- Create a transit hierarchy for movement in the LGA that prioritises pedestrians and active transport, followed by public transport, service vehicles, shared mobility and private motor vehicles;
- Identify signature projects to invest in; and
- Identify short, medium, long term actions that Council can undertake.

Objectives

- (a) To prioritise trips taken by pedestrians, bicycles and other forms of active transport, followed by public transport, and private vehicles.
- (b) To ensure that new development promotes active and public modes of transport through car share facilities, end of trip facilities, and effective links to public transport.
- (c) To encourage reduced rates of car parking where adequate modes of public or active transport are available.
- (d) To ensure that parking and access do not dominate or adversely impact upon the character of the streetscape, landscape and the development.
- (e) To prioritise and maintain pedestrian amenity and safety.
- (f) To ensure on-street parking supply is protected by minimising impacts of additional vehicular kerb crossings.
- (g) To encourage on site car parking that considers flexibility in the design to allow easy transition to alternate uses in the future.
- (h) To discourage podium or above ground car parking.
- (i) To prevent on street car parking being utilised by occupants with allocated car parking bays.
- (j) To provide convenient and accessible parking that is appropriately designed and located.
- (k) To achieve a high standard of urban design and contribute to the amenity of streetscapes and landscapes.
