

7.1 STREETSCAPE

Objective

- (a) To ensure the provision of off-street parking is subject to considerations of urban design, streetscape and heritage conservation.
- (b) To balance car parking provision and access with urban design and amenity outcomes.

Controls

- (a) A Streetscape Analysis is to be submitted in accordance with the *Waverley Development Application Guide*.
- (b) Where off street parking is not characteristic of the streetscape, vehicular access from the street is not permitted.
- (c) Car parking and vehicular access must not dominate the streetscape. Landscaping is to be used to soften the impact of such structures/areas.
- (d) Car parking and driveway design is to preserve mature or significant trees and vegetation on the site and in the surrounding streetscape. A significant tree refers to a tree identified on the Waverley Significant Tree Register, or a tree or vegetation that forms part of a Heritage Item or is within a Heritage Conservation Area.
- (e) Existing natural rock faces and heritage listed sandstone walls must not be removed for the purpose of car parking.
- (f) Entry gates and structures for car parking should be an open design to allow for improved security by way of street surveillance and to reduce any impact on the streetscape.
- (g) Parking structures are to maximise natural light and ventilation.
- (h) Separate and clearly differentiate pedestrian and vehicle access to the site.
- (i) Basement parking areas and structures:
 - (i) In Bondi Junction must not protrude above the level of the adjacent street or public domain;
 - (ii) In other areas, must not protrude more than 1.2m above the level of the adjacent street or public domain.
- (j) Where visible, basement structures and vent grills are to be integrated into the building and landscape design. Ventilation grills are to block views into basement areas and where possible be screened by landscaping in garden beds with a minimum soil plan depth of 1m.
