

7.2.4 Parking for Low Density Residential Development

Controls

- (a) For new dwellings, car parking should not exceed the rates outlined in Table 4.
- (b) Notwithstanding the above, a reduced rate (or no parking) may be required in the following circumstances, where:
 - (i) Parking may have a detrimental impact on the character of the streetscape, heritage item or heritage conservation area, or health of a mature or significant tree.
 - (ii) A driveway cannot comply with maximum gradients and design standards required by the Australian Standards.
 - (iii) Vehicle entry and exit may have a detrimental impact on pedestrian and traffic movements and safety or nearby services or infrastructure.
 - (iv) The access to the on-site car parking will result in the loss of more than 1 on-street car parking space or equivalent available kerb space, as measured cumulatively along the entire block..
 - (v) The streetscape has limited existing off-street vehicular access and/or consists of a narrow carriageway that does not facilitate efficient vehicular turning movements into off street car parking areas (three or less movements).
 - (vi) There is low on-street parking availability and no net car parking public benefit.
- (c) Where an applicant proposes to provide more than the number of on-site car spaces specified in (a) the additional spaces will contribute to the Gross Floor Area calculation and additional justification must be provided to cover matters such as, but not limited to the impact of:
 - (i) Parking compared to alternatives such as landscaping;
 - (ii) Any increased building bulk on the streetscape;
 - (iii) Any increased building bulk on the amenity of adjoining properties;
 - (iv) The loss of existing on-street parking illustrating existing and proposed off street parking;
 - (v) The level and impact of any excavation; and
 - (vi) Access to public transport.

7.2.5 Motorcycle parking

Objectives

- (a) To encourage alternative forms of transport.
- (b) To ensure the quantity of motorcycle parking available is enough to meet growing demand.

Controls

- (a) Motorcycle parking spaces are to have dimensions of 1.1m x 2.5m.
- (b) Motorcycle parking is to be provided in accordance with Table 4.
- (c) Motorcycle spaces are to be indicated on the plans submitted, and clearly identified for motorcycle use only when the development is completed.
