

7.6 TRAFFIC AND TRANSPORT MANAGEMENT PLANS

A Traffic and Transport Management Plan sets out the procedures to mitigate and minimise the impacts of the development (both construction and operation) on the capacity, performance and safety of the local road network and traffic systems and also addresses the impacts on pedestrians, public transport, parking and cyclists.

Objectives

- (a) To ensure an adequate assessment is made of the traffic and parking impacts of development on the surrounding road network and adequate measures to ameliorate the impacts are considered.

Controls

- (a) A traffic and transport management plan is required to accompany a development application for the following developments:
 - (i) Child care centre;
 - (ii) Residential development over 15 units or more;
 - (iii) Commercial development with over 2,500m²; or
 - (iv) Other development at the discretion of Council.
- (b) The study should provide an assessment of the traffic and parking impacts the development proposal may have on the surrounding road network and must address matters such as:
 - (i) Current on street parking restrictions and availability;
 - (ii) Time of peak demand;
 - (iii) Proportion of people using facilities on site;
 - (iv) Hours of operation;
 - (v) Current traffic conditions;
 - (vi) The likely impact of the proposed development on existing traffic flows and the surrounding street system;
 - (vii) Safety of pedestrian and vehicular movements in and around the centre;
 - (viii) How impacts of drop-off and pick up will be accommodated; and
 - (ix) Deliveries to the site.
