

7.8 ELECTRIC VEHICLE CHARGING POINTS

Objectives

- (a) To prepare future buildings for the requirements of electric vehicles.

Controls

- (a) Electric vehicle chargers and Electric Vehicle Ready infrastructure should be installed as per the rates and specifications in Table 7.
- (b) Electric Vehicle Distribution Boards should be installed to achieve the requirements in Table 7.
- (c) All charging point locations are to be identified on CC Plans.
- (d) All charging points are to have clear signage identifying location, any fees and charges and whether the bay is for public or private use only.
- (e) Charging stations should allow for monitoring and individual billing payment through an Open Charge Point Protocol compatible software back end and NMI registered electricity meters.
- (f) All mixed use, commercial and residential flat building development with on-site car parking should provide at least 1 dedicated space and charging point to be used for electric bicycles and mobility scooters.

Definitions

- Electric Vehicle Ready: a dedicated circuit and cable storage for each parking space with power demand management system to enable all circuits to be used simultaneously.
- Electric Vehicle Distribution Board: a distribution board dedicated to EV charging that is capable of supplying at least 50% of EV connections at full power at any one time during off peak periods. The distribution board will be complete with an EV Load Management System and an active suitably sized connection to the main switchboard.
- Charging Station: an electric vehicle charging station with a minimum power output of 7kW single phase.
