

Supply Chain & Logistics

Vendor Risk Maps: Free US Import/Genius shipments CSV → Gephi modularity → Identify single-source failure points for manufacturers (\$5K optimization reports)

Port Congestion Networks: MarineTraffic AIS data → Degree centrality on vessel delays → Sell predictive alerts to freight forwarders (\$1K/mo)

Marketing & Social

Influencer Discovery: Twitter follower CSV exports → Betweenness centrality → Agencies pay \$2K per KOL network map

Viral Content Clusters: Reddit comment threads → Community detection → Spot emerging trends for brands (\$3K/campaign)

Finance & Crypto

Insider Trading Signals: SEC 13F holdings CSV → Overlap networks → Hedge funds buy "hidden ownership" visuals (\$10K/qtr)

DeFi Yield Farms: Dune Analytics transaction graphs → Shortest path exploits → Premium Discord signals (\$100/mo subs)

Biotech & Pharma

Drug Repurposing: PubChem interaction matrices → Bipartite projection → License pathway visuals to startups (\$15K/study)

Clinical Trial Gaps: [ClinicalTrials.gov](https://clinicaltrials.gov) sponsor networks → Gap analysis → Grant writers charge \$7K per proposal

Political & Media

Lobbyist Influence: OpenSecrets donation graphs → Eigenvector centrality → Sell to journalists/pundits (\$2K/report)

Misinfo Spreaders: Tweet reply trees → Timeline + centrality → Platforms pay for audit reports (\$8K)

Sports Betting

Player Trade Networks: Transfermarkt transaction history → Similarity clustering → Fantasy league edges (\$500/mo subs)

Injury Prop Bets: Team medical staff connections → Risk propagation maps → Bookies license visuals (\$3K/season)

Quick-Start Exploit Stack

Data Source	Gephi Workflow	Client	Price
OpenCorporates	Director overlaps	VCs	\$5K
MarineTraffic	Vessel delays	Logistics	\$3K
ClinicalTrials.gov	Trial failures	Biotech	\$7K
Etherscan	Wallet clusters	Traders	\$50/mo

Execution: Download CSV → Table2Net converter → Gephi (GeoLayout + ForceAtlas3 + Modularity) → SVG export → Upwork pitch. First \$10K within 2 weeks.

Every public relational dataset = arbitrage opportunity. Scale by niching (e.g., "Gephi for Australian property planning").
